		Variable Names		
	ID names and Class names should be in Camel case			
Commenting guidelines	Prefer comments on their own line. Avoid end-of-line comments.	$accent	#f38d8d	orange
	Use comments to divide main sections	$primary1	#227284	dusk blue
		$primary2	#68B0C1	grey blue
Selectors	Column (seperate selectors by comma then new line)	$primary3	#B9DDE7	light blue grey
	CSS Selectors should be in the same order as HTML elements	$primary4	#F6F6F6	white shade
	Using SCSS style with the brackets (nested SCSS style)	$black	#171717	black
	Do not nest more than 3 levels deep	$white	#FFFFFF	white
	Use HEX color codes	$headerFont	"Oswald", sans-serif;	
	No ID's for styling	$bodyFont	"Cabin", sans-serif;	

General Styling Stuff

Label	Description	
html font size	125%	
Button:Hover state	For now, when hovered, background can go that red color	Can we remove this? I had a different interpretation of the design, and I don't think it's necessary for the our CSS Style guide
	but when not hovered, maybe have a black bg for now.	
Nav:focus/Hover	When hovered, go from black to white	
Main Header (giant HARPER text)	font-size: 6rem	
An overall structure for your project		

Whatever else your group needs to be able to effectively produce code that could reasonably all come from the same "company".
